REMARKS

Commissioner:

The above-identified patent application is a divisional of allowed U.S. Patent Application No. 09/151,409, filed September 10, 1998, to which priority is claimed under 35 U.S.C. §120. In addition, U.S. Patent Application No. 09/151,409 claims the benefit of United States Provisional Application No. 60/058,635, filed September 12, 1997, pursuant to 35 U.S.C. §119(e). Consequently, a "Cross-Reference to Related Application" paragraph has been added to include the parent and provisional applications.

Applicant respectfully submits that the instant specification has been amended to include the amendments made to the specification of the parent application, USAN 09/151,409. In addition, the abstract has been rewritten to more clearly describe the instantly claimed invention.
